

# Patch - v3.35 - October 1, 2019

Last Modified on 10/01/2019 12:25 pm PDT

**Release Date: October 1, 2019**

---

## **What's New?**

### **Feature Flag for Task Grouping**

In this release, ICIX will be able to turn ON/OFF the Task Grouping feature for related requests. By default, when multiple requests are sent off to the same Trading Partner at the same time, those requests will share the same related request ID. This ID is what is used to group together similar requests on the ICIX Tasks page for easier visibility of tasks. If you would like this feature to be turned off, please contact your ICIX representative.

---

## **Bug Fixes**

- ICIX Tasks - User redirected away from grouped task when updating one task
  - ICIX Tasks - Search is not working for grouped tasks
-
