Patch - v4.39.1 - August 11, 2022

Release Date: August 11, 2022

Bug Fixes

- Fixes and issue where the date supplied in a date or datetime field in a form does not correctly match the value stored in the backend object.
- Request to Provide API details of ICIX Standard Request API to create bulk requests Admin users can now create requests in bulk by using the standard ESG Request API. See api.icix.com for more details on this API.
- Fixes and issue where form field dependencies (show/hide questions) is not working with parent picklist question values.
